

Kim Michel
Waldoboro
LD 716

As a Maine farmer, I have observed coyotes hunting in fields adjacent to my own for years and am always glad to see them. The most damage I have incurred on my farm has been from creatures such as rabbits, woodchucks, voles, and deer which coyotes naturally help keep in check. I welcome the coyote presence in the diverse fields and woods ecosystem that surrounds my farm and would be very heartened personally as well as from a business perspective to see LD 716 pass.

Thank you for your consideration.
