Portland
LD 260

I would like to express my strong support for LD260. At a time of nonstop threat to the health and material wellbeing of Mainers, especially our most vulnerable community members, this amendment would help protect people from harm. We need to be vigilant about defending our rights from those who are constantly fighting to take them away. I urge state lawmakers to proactively solidify whatever rights they can at the state level in order to keep our residents safe. Thank you.
