i strongly appose this bill because it would have a huge impact on our deer and small game with no means to control there population  
we all know we will never kill enough of them to hurt there existence ,  
all we can hope for is to keep them from forming large packs that then would have the ability to go into our deer yards or into small pockets of woods where our rabbits and other small game lives and wipe them out ,witch they will do given the chance ,  
and then the coyotes next target will be house hold pets and farm animals  
there is a reason that the majority of the states in the USA basically have open seasons

'  
we need to keep it as it is  
thank you for your time
