LD 593

Dear committee members,

I am writing in support of L.D. 593 to continue funding for the very popular Land for Maine's Future program. In fact I would like to see more than 10 Million dollars earmarked for the coming 2 years. While I understand the need to be fiscally responsible, the need to protect far more farm, coastal, and forest land has become even more crucial now in the face of climate chaos. Yet the funding for this widely supported program has dwindled over the years since it was first implemented. This program is a key component of our guide to climate resilience, Maine Won't Wait. Let's not shortchange it.

Thank you,

Rockland
