

Kathryn Dana
Cumberland
LD 593

I am writing in support of LD 593 to extend funding for the Land for Maine's Future Program. Protecting water access, outdoor recreation, working lands and waterfronts, and fish and wildlife habitat is critically important and cannot happen without adequate support, especially at the state level. This funding proposed by LD 593 would serve as an important source of financial support for LMF until permanent, ongoing funding is secured, and I urge you to approve the proposed extension. Thank you.
