I DEMAND the legislature do something to relieve the property tax burden currently levied on senior citizens in Maine. We are currently in our mid 70s and retired our only income from social security . We cannot afford to continue the property taxes levied on our homestead where we have lived for over 40 years. It is an unfair burden for seniors who have been paying higher property taxes the bulk of which goes toward the "education" of children whose parents have settled into our Brownfield township in recent years and demand new school buildings and "special education " for their children whom they allow to watch their idiot boxes all day and night instead of studying. Why do we have shoulder the burden of such neglective, lazy parents who will force us out of our homes and into senior care facilities and the burden will be increased and loaded onto the shoulders of taxpayers?? Do something to stop this from happening, PLEASE!!
