LD 593

LD 593 is a timely proposal for furthering multiple goals. Who can argue with food, fishing, and fun?

Crucial progress can be made for Mainers accessing agricultural lands — to grow local grains and vegetables, & raise quality farm animals. Funds can also be used to expand waterfront access — useful for both commercial fishermen & people working in tourism. Undeveloped land provides iconic recreational opportunities for all to view or visit: quality of life! Past generations of Mainers have given us everything that previous LURC funds provided. Let us step up now and be the generation that furthers this gift!
