To whom it may concern,

I have been a licensed massage therapist since May 2007. I have since been an active massage therapist in the state of Maine. I have taken CEU courses over the years to advance my knowledge in this field and to help my clients achieve a better state of wellness within their body. Passing this bill will make me have a halt in my care with my clients. I do think current licensed massage therapist should be grandfathered into this bill, if it should pass. I do believe that continual education courses are a benefit, however, those that have been actively working in this state all this time, should not be penalized due to this change.
