LD 830

I VERY STRONGLY URGE you to vote OUT TO PASS on LD 830, An Act to protect Maine's scenic beauty by requiring solar panel fields to be hidden from view. AMEN! There is nothing worse than looking out on a field of solar panels for a multitude of reasons. They not only are very inefficient given our short days of daylight and the angle of the sun to us at this latitude. they are also harmful to the environment. They cover grass and shrubs that die from lack of sunlight, how ironic. These vegetations produce oxygen for us to breath. Again, how ironic. They cause still other tall trees to be cut in order to give them space. Still more oxygen generating vegetation gone. Then, once they are ruined by the strong deteriorating rays of the sun, they are nasty plastic in a landfill, poisoning our planet even more. I see NO good side to a solar field whatsoever, not to mention how ugly they are and how they ruin ANY VIEW on a usually pleasant ride through the beautiful state of Maine. There is a sign going towards Baxter state park that reads, THIS IS GOD'S COUNTRY, DON'T SET IT ON FIRE AND MAKE IT LOOK LIKE HE@@.

Please vote OUGHT TO PASS on LD830 and keep our beautiful state from looking like HE@@! Thank you!
