

Susie Miller
Resident of Maine
LD 825

I am writing this in support of bill LD 825 "An Act to Prohibit Geoengineering, Including the Use of Cloud Seeding, Weather Modification, Excessive Radio Waves and Microwave Radiation" . Above you will find the link to a page outlining all of the patents that have been given for this industry.

I urge you all to vote ought to pass! The citizens of this state have been watching these chemtrails for many years and there has been testing done in soil and water in areas where they have been sprayed. I didn't have time to find that data but I have read it in the past and know it exists.

Please take the time to read through the patents.

I appreciate your time
