

Jeanie Barnard
Yarmouth
LD 486

This bill most likely would lead to an increase in homicides, if our state reflects what has happened in other states. As a mental health professional I can tell you that citizens are anxious enough about their safety without giving them another tool with which to harm people. What we need is more emphasis on public safety and that includes gun safety. I strongly oppose this law as a health professional. Sincerely,
Jeanie Barnard, LCSW
