South Portland
LD 486

This is a very disturbing proposal which I hope the legislature will see for what it is:

- ~~ a movement AWAY from responsible and reasonable gun laws;
- ~~an opportunity for a person to "shoot first and ask questions later" without fear of consequence;
- ~~ a NEEDLESS addition to the laws already in place preserving a person's right to protect their home and family;
- ~~ an inevitable doorway to "accidental" deaths. and avoidable bloodshed, heartache, and tragedy;
- ~~ a move by government that fosters fear and suspicion among neighbors and communities.

Please don't let the gun lobby pull the wool over your eyes by calling this a "defense of personal freedom" issue. It's a dangerous and redundant precedent for our State. Please do not allow this bill to move any further through the legislative process.
