This proposed legislation would remove another safeguard around gun usage. Really think about it: who but a criminal or mentally ill person has a gun right by their door waiting for some perceived life threatening event. Why would you as legislators uphold this view of the world?

Gun use in this country has gotten so out of control. If we all have guns, the why do we need police? Judiciary? Government?

Please do your jobs & support we the people, not an agenda or gun nuts.

Thank You
