

Julia Frederick
Freeport
LD 865

To the Committee Members,

I am a resident of Freeport and a mom of a 2.5 year old. We were very lucky to receive high quality, compassionate Clinical IBCLC services when my daughter was an infant struggling to nurse and struggling to keep a healthy weight due to a tongue and lip tie.

I ask you to support LD 865. All families deserve the opportunity to access the same care that we did, care that supported my daughter's and my physical and emotional wellbeing during a challenging time.

We initially struggled to find high quality affordable and regular Clinical IBCLC services in the beginning before we found the right fit, and i hope that this bill is appt so that women and babies get connected faster to ease their minds and support their wellbeing during the very challenging post partum phase.
