

Lisamarie Weston
Vassalboro
LD 832

My husband and I both have jobs and work hard like everyone else. We moved to Vassalborro with our six children plus one, in 2021 when we bought our house. We love the town, the school system etc. One thing however that is making it expensive to live here is the sewer bill. With nine people in the house, our bill is close to \$600 per quarter. This is with regular water use. Baths, showers, laundry etc. This is hard on us, as we do not have any outside financial help from anywhere. We do not have any state aid of any kind, and pay for our house and family on our own. We have never asked anyone for anything, but we would ask for you to help this town lower the sewer bill debt. It's not just my family struggling to pay this bill, it's all of us. Many people are older, and do not have the ability to get a second job, or simply work more hours. Please help our town so we can all continue to be able to afford to live here.
