LD 929

I urge you to vote in favor of LD 929 as I believe it would positively benefit the medical program. I am a patient and also work in the industry, and believe that this bill would remove an unnecessary barrier for populations that are shown to use cannabis at high rates and also are likely to have a condition that would qualify them for medical certification. It would remove the burden of having to have a PCP who may not be able or willing to write the patient the proper certification, and would allow the patient to access the medicine they need. Thank you for your time.
