LD 787

I VERY STRONGLY URGE you to vote OUGHT TO PASS on LD787, An Act to clarify residency requirements for and provide funding to the Maine School of Science and Mathematics. Absolutely! Maine public schools are in shambles. We are next to the bottom for the whole U.S. We need a place to send our children where they will learn to be smart and accomplished citizens. It is shameful what the public school system is teaching our future leaders of the world. Nothing that will help them make the world better place or help them to survive. If we would put \$1.3M into our public schools toward greater learning, I would say yes to that as well, but we insist on the WOKE and DEI agenda and gender "reassignment." Not very useful to a productive future. In fact, quite the opposite, as our test scores show. I believe this is a good idea and I wish this money could be used to bring back our schools. Until then, this is a good way to go. Thank you for helping in the education of our young Mainers by voting OUGHT TO PASS on LD787.
