

Diane Vernesoni
Topsham
LD 878

I URGE you to vote OUGHT NOT TO PASS on LD878. Resolve, to study the effects of 5G and other non-ionizing radio frequency radiation -emitting technology on birds, bees, insects and other wildlife populations and the effects of long-term exposure on children. Are you kidding me! My goodness, take about "airplane parents!" There are much more harmful things coming at us from the sun and all the planets, but we have survived. More housing, more people, more cars, and planes and roads, and trains, and buses and trucks, etc. We, the people, do the most damage to our world, should we outlaw people, or is it coming to that. We, in America in particular are trying to make the world perfect. It already is. Man was meant to survive and build this world, and they have. We are inundated everyday with radio waves and microwaves, and radiation. Are we willing to go back to the days of not having any of those things, or computers. I bet not! This is just another meaningless way to spend the taxpayers hard-earned money on a useless survey that will have no reasonable answer or purpose. Therefore, I implore you to vote OUGHT NOT TO PASS on LD878. Thank you!
