

Meredith Bruskin
Swanville
LD 795

Hello Senator Tepler, Representative Doudera and ENR Committee members, My name is Meredith Bruskin , a FNP from Swanville, and I am writing about the urgency of doing everything we can here in the State of Maine to protect our beautiful way of life, and our planet--

I am also writing asking you to vote Ought Not to Pass on LD 795 " An Act to Exempt Pegmatite Mining from the Maine Metallic Mineral Act" , clearly a bill to create a loop hole to avoid protections and clear oversight on corporate mining operations. Again, you are certainly in a position to help protect our environment from corporate greed and climate change denial--and I know this is not easy. But please be courageous and speak for those us who are trying to protect the environment, and our future with you. Certainly Maine is now the only entity who is thinking about how to protect Maine's citizens and our natural resources for just and judicious use, and that is in your power. Help us control this new onslaught on our rich natural world. Please consider all our children and grandchildren's futures---this is an essential bill to defeat-PLEASE VOTE NO ON LD 795. Thank you very much.
Meredith Bruskin, FNP
