I support this bill. This bill supports the rights of employees to securely keep firearms in their vehicles while at work, provided the vehicle is locked and the firearm is not visible. It ensures that employees, including state employees, are not unjustly restricted from protecting themselves by storing firearms in their personal vehicles on property owned or leased by the State. The bill respects individual rights while maintaining public safety by establishing clear guidelines: firearms must be stored securely and in accordance with existing laws. By allowing employees to have firearms in their vehicles, the bill helps to ensure that law-abiding citizens are able to exercise their Second Amendment rights while not interfering with workplace safety or legal regulations.
