Kittery  
LD 1073

I am Judith Andrews from Kittery . I have strong generational ties to the western part of Maine and my family still maintain several camps and visit the area for 9 months of the year. I am writing to voice my opinion on the bill before you today. "We already have gold". Our highest concern as citizens should be for the enviroment and the health and well being of those who work ,live and recreate in our state. This is our "gold". Our natural resources , people and land , cannot be replaced once destroyed by recleckless disregard and greed. Please pass this bill.
