This bill takes away the ability of a citizen to defend themselves from a person with criminal intent. The criminal, I'm sure, will not have checked the statute prior to committing a crime with a firearm, to make sure they are using a magazine with a limited capacity. Where is the research behind a magazine limit of 10 rounds ? In practice, a 15 round magazine vs. reloading with two 10 round magazines has a time difference of a few seconds. This bill makes little sense other than to give some people a false sense of security. I spent a few years in law enforcement many years ago, and can tell you without reservation, that a criminal does not follow any rules. So as mentioned at the beginning of my comments, this bill only takes away the right and ability of a law abiding citizen to defend themselves, their families, or others in imminent threat.
