

Kathryn Crisp
Hollis
LD 975

As a somewhat older citizen, born in 1939, I've witnessed many changes in this nation. In 1963, one woman, Madeline Murray O'Hare was able to remove the Bible from our schools. Scripture reading and prayer was part of the school morning for classes, and reciting the pledge of allegiance . There was the knowledge of Gods moral compass which has slowly been removed and replaced . By 1973, only ten years later, we are killing babies. A mothers womb, where babies should be the safe, protected and loved, became a place of maiming and murder. Please rethink how far we've fallen as a nation; examine your own hearts, and pass this bill LD 975 for your peace of mind, for what's right before God, and love your preborn neighbor as yourself. Perhaps through repentance God will hold back the national judgements.
