

Deborah Murray  
Portland  
LD 1126

to: Senator Carney, Representative Kuhn and the Judiciary Committee members-

Supporting LD 1126, the "ghost gun" bill, will serve all Mainers except for the criminals who use, make and sell them. Not only could the bill save lives from gun violence, unserialized guns make it hard for law enforcement to solve a crime.

3D printing has many positive uses-even modular homes have been created at our state university. Unfortunately a deadly weapon can also now be made on a 3D printer and if that gun is involved in a crime, because it is undetectable, the crime has a good chance of going unsolved.

Maine needs a strong serialization law. Please support LD1126 and vote it " Ought to Pass"
