LD 211

I am writing today in support of LD211 the Seizure Safe Schools Act. As a teacher in the public school setting, educating public school employees on how to act when a person is experiencing a medical event like this is essential to the well-being and safety of all our students. It should be a required training much like many of our other trainings we receive in order to work in a school setting. We have students that are depending on us being ready to go in case they experience a medical event and we have a obligation to do that training.
