A recent National Shooting Sports Foundation study found that nearly 1 billion detachable magazines are currently in circulation for both rifles and pistols. Due to this massive volume of standard-capacity magazines (what is standard capacity anyway?) in circulation, criminals will continue to have unfettered access to such magazines, while law-abiding citizens will be restricted to low-capacity carrying capabilities.

Why do democrats like this? Because they HATE the people.
Democrats are all about them selves and will trample over any one to further themselves.

Prove me wrong.
