Veazie
LD 69

I'm writing in reference to LD69, Repealing the Law on Restricting plastic bags and etc. Why in the world are we considering repealing this law? Why is the Legislature discussing this instead of affordable housing or healthcare? Are reuseable shopping bags too "woke"? Please. I work in retail, people are fine with the end of wasteful one-use bags. Out-of-towners visit the store I work in and are impressed that Maine is reducing waste. Our citizens consider this a done deal. Do not repeal this, do not spend time on this. Make your time in Augusta count. Reduce waste. Reduce the cost of bags for shopkeepers. Thanks.
