

Lisa Belanger
North Yarmouth
LD 69

I am resident of North Yarmouth testifying in opposition to LD 69. The reason is simple: plastic is polluting our earth - both sea and land... and killing us in the process. Did you know for instance that nano plastics are now found in increasing amounts in the human brain. Not only that, but they have also been found in larger concentrations in the brain than in any other organs of the body. Does that sound like something we want to continue to see happen? What will be the consequences for our health if we do? The law restricting the use of single use plastic bags was created for a very important purpose - to protect us, our world and our future. Let's not undo a good thing for no good reason. Thank you.
