

Martha B. Higgins

Trenton Solid Waste Committee, Director for Trenton - Acadia Disposal District,

MDI Zero Waste Committee

LD 69

As a state, Maine has been at the forefront of controlling plastic waste. The ban on single use plastic bags has been extremely successful in reducing this scourge from our trees, ditches, lawn, shrubs, and landfills. It is evident every day while traveling our state. I hope that this law will remain and that Maine will remain vigilant in reducing and eliminating as much plastic waste of all kinds as possible. We've made such a wonderful start, let's not backslide!
