

IN OPPOSITION TO:

LD 424: An Act Concerning the Concealed Carrying of a Handgun by an Individual Who Is 18 Years of Age but Under 21 Years of Age LD 953: An Act to Change the Definition of "Machine Gun" in the Maine Criminal Code LD 1049: An Act to Eliminate the Duty to Inform a Law Enforcement Officer When Carrying a Concealed Handgun Without a Permit

Joint Standing Committee on Judiciary State House, Room 438 Wednesday, March 26, 2025

Good morning, Senator Carney, Representative Kuhn, and distinguished members of the Joint Standing Committee on Judiciary. My name is Rebecca Boulos. I am a resident of South Portland and executive director of Maine Public Health Association.

MPHA is the state's oldest, largest, and most diverse association for public health professionals. We represent more than 850 individual members and nearly 70 organizations across the state. MPHA works to optimize the health of people and places in Maine through advocacy, education, partnerships, and public health workforce development. We are not tied to a national agenda, which means we are responsive to the needs of Maine's communities, and we take that responsibility seriously.

Introduction

Violence in America, and here in Maine, is a public health crisis that affects people in all stages of life, from infancy to older adults. It leaves physical and emotional scars, derails lives, and erodes communities by reducing productivity, decreasing property values, and disrupting social services.¹ Violence is also a vicious cycle – if someone is exposed to violence, they're more likely to commit future violence.² Violence is a leading cause of premature death and disability in the U.S., and here in Maine.

Data show that different types of violence tend to co-occur, such that in areas where there are higher rates of community-level gun violence there are also higher rates of domestic violence and child abuse. At the community level, gun violence tends to occur more often in areas already experiencing social and economic disparities, including geographic racial segregation and concentrated poverty.³ Moreover, childhood trauma, including domestic violence and community violence, may be a risk factor for gun violence later in life.⁴ A public health approach to violence prevention fosters healthy gender norms and relationships, bolsters trauma-informed services, limits access to firearms, and works to mitigate racism by changing norms and behaviors; collectively, these efforts lead to reductions in violence.⁵

Violence in the U.S.

- According to the U.S. Centers for Disease Control and Prevention, in 2022, there were more than 48,000 firearm-related deaths in the U.S., equivalent to 132 people dying from a firearm-related injury every day.⁶
- Firearms remain the leading cause of death for children and teens.⁷
- According to the <u>Gun Violence Archive</u>, in 2024, there were 503 mass shootings in the U.S.

122 State Street, Augusta, ME 04330 • 207-808-0487 • mainepublichealth.org

• Already in 2025 (as of today, March 26, 2025), there have been 59 mass shootings in the U.S. Nearly 3,200 people, including 270 children (youth ages 0-17 years), have died in the past 3 months due to gun violence.

Violence in Maine:

- In 2023, 18.3% of middle schoolers reported that violence in their home, or the threat of violence, made them want to leave home, even if only for a short while.⁸
- Domestic violence represented 29% of total reported assaults in 2022.⁹
- 1 in 5 Mainers will experience sexual assault during their lifetime.¹⁰
- According to the Maine Center for Disease Control and Prevention, nearly 89% of firearm fatalities in 2021 were suicides, a rate significantly higher than the national average.¹¹
- One of the deadliest mass shootings in America occurred here in Maine, claiming 19 people's lives.

We oppose LD 424: "An Act Concerning the Concealed Carrying of a Handgun by an Individual Who Is 18 Years of Age but Under 21 Years of Age," LD 953: "An Act to Change the Definition of "Machine Gun" in the Maine Criminal Code," and LD 1049: "An Act to Eliminate the Duty to Inform a Law Enforcement Officer When Carrying a Concealed Handgun Without a Permit" because we believe they will make Maine communities less safe.

With the prevalence of gun violence in Maine, we should not roll back protections for law enforcement or restrictions for young people's access to firearms, which is what LDs 424 and 1049 would do. And, while we appreciate the proposal to establish a framework for the term "Machine Gun," we support the proposal in LD 677 as we believe it is clearer.

Gun violence is not inevitable. It can be prevented through a comprehensive public health approach that keeps families and communities safe, while respecting responsible gun owners. As such, we oppose these bills. We respectfully request you to vote LD 424, LD 953, and LD 1049 "Ought Not to Pass." Thank you for your consideration.
