

Mary Royal
Winterport
LD 253

Good day Members of the Judiciary Committee, I am writing to oppose LD 253 and all the bills that would interfere in a woman's or a couple's right to choose what is in their best interest. Any woman or couple who determines that an abortion is the most appropriate outcome given their personal situation should have the right to make that determination without the intrusion of government in that decision making process. Abortions will occur whether you and I 'approve' of them and the best possible approach is to insure they are provided in a medically supervised environment. It is the only sensible position to take. It is my sincere hope that you will vote ONTP on all bills that will interfere in this difficult enough as it is decision. Thank you.
