LD 436

I VERY STRONGLY URGE you to vote OUGHT TO PASS on LD436, An Act to prohibit state agencies from promoting the COVID-19 vaccination to children. Absolutely! This COVID vaccination hoax has gone on long enough! The hoax being that there is a vaccine that is going to save you from COVID-19. This pandemic went further toward killing people than saving anyone. People died from the effects of the so-called cure of Remdesivir than died of just having COVID. It was terrible! The vaccines are even worse, especially for males. They are causing myocarditis and long lasting and physically debilitating conditions. I have a son in the service, and he has had at least 6 shots. I fear for his future health. If you have to have more than one round to give you immunity from something, I will say your "cure" isn't working and should be stopped before more people die from it. I ask you PLEASE DO NOT VACCINATE OUR CHILDREN WITH THIS TERRIBLE MEDICAL FAILURE! VOTE OUGHT TO PASS on LD436. Thank you!
