Appleton
LD 253

I'm writing because I am disgusted at these anti-freedom bills—LD 975, LD 253, LD 682, LD 1007, LD 886, and LD 887—aren't about protecting life. They're about putting the government's boot on our necks and controlling us. They're about taking control of our bodies like they are trying to. Isaiah 10:1 Woe to those who make unjust laws, to those who issue oppressive decrees, to deprive the poor of their rights and withhold justice

Maine is a place where people mind their own business and respect each other's privacy and rights. These bills rob us of those rights away. They don't stop abortion—they make it harder and more deadly. They force women to through disgusting barriers to claim their rights, punish doctors, and demand that doctors stand between women and God to lecture them.

This isn't about health. This is about control. Americans shouldn't beg do-nothing-politicians for the right to make decisions about their own bodies. No doctor should live in fear for doing their job. No government should have the power to force themselves into the relationship between my sisters and I, our doctors, and God.

Do you hate America and our freedoms? This isn't Saudi Arabia.

This is a test of how much the government can oversee our lives. Are you here to serve "we the people" of Maine or to control them?

Vote NO on these bills and stop shoving your ideology down our throats.
