

Susan Pritchard
Searsport
LD 253

Good afternoon. I am writing in support of LD 253. Abortion is not healthcare, despite the efforts to present it as such. Doctors have confirmed that there is never a need to resort to abortion to protect the mother's health or safety; the better option is to deliver the child and offer the best possible care to both mother and child. Abortion is not health care and is not necessary; my tax dollars should not have to support it.
