Please support the formulary for Maine's Naturopathic doctors.

These doctors don't just give an Rx to fix an ailment, they take a holistic look at the patient to find the root causes of a problem. My doctor, Sarah Ackerly ND, has helped me resolve intestinal issues I have been dealing with since childhood, no other physicians (and I've seen many!) took the time to truly root out what was causing my gut issues and heal them.

Now she's helping me with post-menopausal symptoms. Naturopathic doctors need access to the same prescribing rights as MDs so they can better manage their patients care.

Thank you for supporting this bill!
