LD 1293

Please support LD 1293 an Act to Prohibit Coyote Killing Contests. Coyotes are an integral member of our ecological matrix. A key point to consider, this is an is an animal that eats mice and helps to minimize the deer ticks and subsequent Lyme Disease, etc..Additionally, the State has a program to cull the coyote population when necessary to maintain ecological balance. Contests for killing any animal is inhumane and should not be supported in our Maine state. Please vote Ought to Pass on LD 1293. Thank you.
