LD 1376

I am in support of LD 1376. In this business climate we are challenged daily with trying to build sales and profits. Having access to these items will only help build our business and profits. It allows us to be more competitive and being able to buy from a distributor as we can price the product more competitively and will be more available to us. We would much rather buy from a distributor as they will manage the product better than our employees as far as delivery schedules, stocking, rotating and making sure product has the right POS on it. Buying from a distributor, in a retailers point of view makes way more sense.
