

Jeannie Ross
Winthrop
LD 174

As a pediatric Nurse Practitioner who has practiced in the State of Maine for over 30 years I am strongly against both LD 727 and LD 174: Both would be a gigantic step backwards in our States efforts to protect our School age children from disease.

The current vaccine requirement and for Maine School kids was overwhelmingly supported and passed a few years ago. It works. These suggested bills are ways to provide " loopholes" that would only threaten kids health.

The current measles outbreak in the US is a reminder of the consequences of not being vaccinated.

Please do NOT support these bills.
