LD 1293

Please support LD 1293. Please, humans have many choices to protect non native "livestock", pets, including invasive #cats. There is no Science to support on going killing that Maine endorses. And contests?! Maine "trades" on wildlife and "nature". Are the millions of people who support the tourism industry aware of the reality? It is as if education has failed to teach humans to learn and know basic Science of ecosystems and biodiversity. Please join the many across the world and ban Coyote Killing Contests. Truly it is beyond the pale to kill and trapping is vile inhumane disgustingly cruel. And finally I wonder if Maine includes data on costs of benefits of ecosystem services in every analysis and decision. Thank you for your work for Maine, and for the sake of decency.
