Bangor
LD 174

I strongly urge LD 174, an act to restore Religious exemptions to Immunization requirements , to be passed. I have been a nurse for over 28 years and as a patient advocate we should be allowed to decide what we want injected into our bodies. Restoring our right that was taken away is the only logical thing to do. For years we had this right and it was taken away. Our population health as a whole and access to services has deteriorated since this right was removed. Please restore it.

Thank you
Darci Lane RN
