I have been seeing a Naturopathic doctor for ten years. It is through this work I have finally found answers and stability with my health. I suffer from asthma, which is one of the primary things I work with my Naturopathic doctor on. They are not able to prescribe basic asthma medication like Albuterol which means I have to make an additional appointment with my GP to receive this medicine. It requires a lot of extra time, money and resources to deal with this medical issue with two doctors. I fully support this bill to streamline the processes for Naturopathic doctors.
