Good Afternoon,

I am in the Aspire/tanf program.

I have been working with the Fed cap opportunity center since I've started receiving tanf.

I really appreciate the Fedcap program and all the help and support they offer.

It has been very confidence building.

I have learned a lot about the direction and training I want and can real do.

I earned my BHP certificate and they guided me to the right programs that will help me in computer classes threw adult ed. I've earned a CPR /first Aide certificate. And my adviser meets with me once a month to help me figure out the best path for career success .

Thank you for this program

R/
