I benefited from a grant opportunity for Maine special educators, several years ago. As a working professional, I was able to complete my masters degree in special education. I was asked to complete a five-year service obligation to the state of Maine in return for the grant opportunity, I have been putting that degree to use and serving the children of Maine for over 20 years now. I believe others deserve the same opportunity to grow and expand their career and in turn be able to benefit the children of Maine, toward long term outcomes.
