LD 727

Dear committee members,

I support LD 727 an act to repeal certain immunization requirements for school. The vaccination requirements have increased to an extremely high number in the past few decades. By age 16 children now have around 72+ vaccinations compared to the parents of these children only had around 10 or so when they reached that age. The health consequences I'm seeing in my own children, along with friend's children and overall seems to be growing as the number of these vaccinations do. From a very concerned mother, I ask that you ought to pass LD 727 Thank you
