LD 1242

I VERY STRONGLY URGE you to vote OUGHT NOT TO PASS on LD1242, An Act to Incentivize the Construction of Solar Carport Canopies and Solar Chargers at Highway Picnic Areas. Beyond the fact that this will cost several million dollars we don't have, it is an idea that won't work well. First, we have many, many days without enough solar energy that this would fail. Second, there isn't enough energy coming from these solar panels to charge a car to travel any distance at all. It would take days to do that, not minutes. Thirdly, where will these places go? On 295, they would have to build a complete area, taking houses and woods, to put these in. Trees give us oxygen. It seems crazy to cut down an oxygen generator for a limited solar collector. It would be cheaper and possibly more productive to put the solar panel on the car itself for perpetual solar energy collection. Although it still won't collect enough to drive a vehicle. Especially on snowy, rainy or overcast days. We have a lot of them in Maine. Please I URGE YOU to vote OUGHT NIT TO PASS on LD 1242. Thank you!
