I am opposed to this bill. Immunizations have helped wipe out so many dangerous and deadly diseases. Eliminating requirements for them is opening a Pandora's box of outbreaks of diseases that have all but disappeared thanks to vaccines. I am old enough to remember the first sugar cube polio vaccines administered in my private school when I was 6 years old. I had an uncle who had polio and spent his life in a wheelchair and dealt with many complications and I'll health. Let's not take a giant step backwards. Please vote ONTP on this bill.
