

Lincoln Smith  
Bowdoinham  
LD 25

I am in strong support of LD 25, as the PFAS contamination in Maine is a serious problem. These horrible chemicals need to be dealt with in a safer way, by reducing the amount of sludge and disposing of the remaining PFAS waste appropriately. As an oyster farmer whose farm was at risk from PFAS contamination from the spill at the former Navy base, I'm acutely aware of how dangerous these chemicals are.
