LD 362

As an owner of woodlands I harvest, I'm writing in Support of LD 362 to replenish the Land for Maine's Future fund. Too much of our forests are being over harvested, developed, and are otherwise losing their integrity while farmland faces even more intense pressure. In order to minimize climate change, we need to protect more forests and farmland through purchases, and encourage careful stewardship into the future with easements. This in turn allows landowners to afford better carbon sequestering practices in forestry and agriculture by taking the long view. LMF has always been popular with voters as it protects crucial access to woods, lakes, and oceanfront while preserving traditional uses. Please support this renewal of commitment to a healthy, safe future.
