South Portland
LD 1292

I support Bill LD 1292 - please consider using the funds amassed for a better purpose than adding more highway that destroys our precious land, farms, wildlife and way of life in Maine.

The funds can be used for alternative transportation methods including: widening and repairing existing roads/highways, adding and improving current bus routes and schedules, implementing studies to start using railway transportation, addressing expensive housing pricing that forces people to move far from the urban areas, etc. There are so many other ways we can figure out how to improve transportation in Maine.

Please listen to the people of these communities coming together with one voice and hear what they are saying.

Thank you,
Maryann Aresti
