Please, You must provide a great part of the millions of dollars for low income SENIOR CITIZENS TO REPAIR & upgrade their homes so they may choose to live in it instead of going into a nursing home or elsewhere. With the variety of programs to house Maine's poor citizens, there has been disgracefully hardly anything for Senior Citizens in this matter and you must divert funds for us who need our homes fixed, made more livable comfortable and safe. Just planning to help house younger generations primarily and often and wrongly only, is not sensible nor creative nor with insight. We, the low income elderly can live also another 10, 15, 20 25 years if we have proper housing of our own and use these years to continue to be productive citizens of merit. Concentrate on us and allow the funding you are approving to go more towards Senior Citizens of Maine living in their own little homes and being happy to have been part of America and planet earth's society. Thank you for using your ability to care. sj
